

## AAPG BULLETIN

### INDEX OF VOLUME 63 (1979)

The format of the 1979 *Bulletin* Index consists of only *one* index of titles, authors, and keywords. The 1979 reviews of recent publications are included for the first time in our computer indexing (which began in 1965).

The left-hand columns are: B = *Bulletin*; 6301 = volume 63, no. 1, etc; and the page numbers. Code symbols used are:

† = phrase from title of an article.

\* = phrase from an abstract title.

This index does not show multiple authors in any single listing. Each author is listed separately.

Note: Only single-line entries are used; the line is terminated after the last full word. Where title entry is inverted, a comma appears before each key-word in that entry.
